WEATHER OF CONCERN

Weather of Concern

- Moderate to strong offshore winds are expected through 1500 hours today. Gusts up to 55 mph will occur at times over the Los Angeles, Ventura Mountains, and Santa Monica Mountains.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

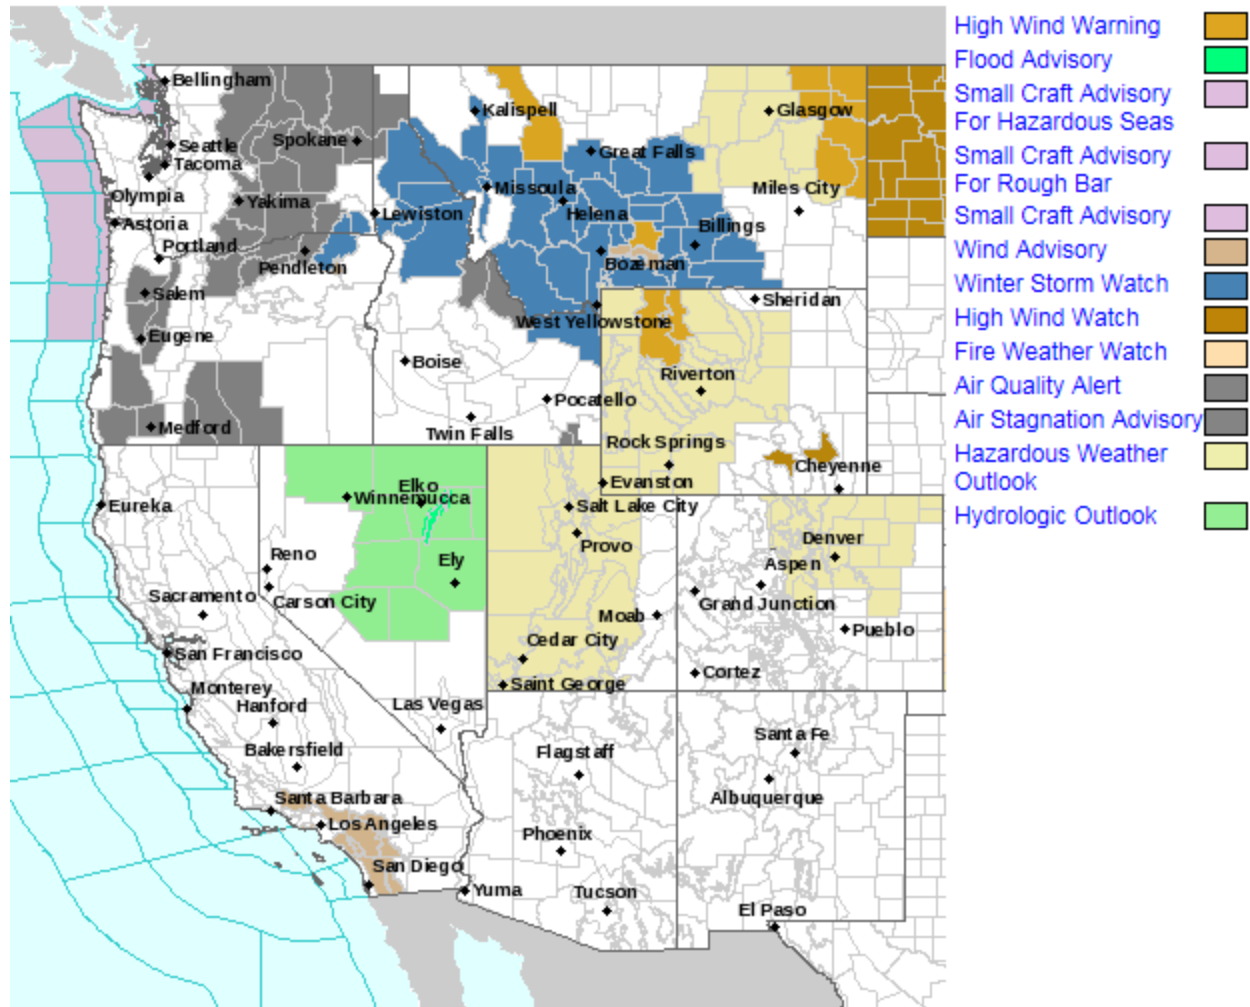

Dry next several days with patchy morning valley fog. Wet pattern returns with light precipitation Wednesday with heavier rain and mountain snow Thursday and Friday. Upper level high pressure system continues to be centered over California and the eastern Pacific. Clear skies brought cooling temperatures across the Valley overnight with the development of patchy fog. Patchy frost is also possible this morning with low temperatures dropping to near the freezing point. Ridge of high pressure is expected to continue to build this weekend and provide plenty of sunshine and dry weather for today into Monday. Temperatures will gradually warm up through Monday and become a few degrees above normal across the region. Latest model guidance has slowed the progression of the incoming storm system again, which is now looking more likely to affect the region with light precipitation Wednesday morning. Heavier precipitation is more likely to start over the region Wednesday night with snow levels between 4000 and 5000 feet.

SOUTHERN CALIFORNIA

High pressure and gusty offshore winds will bring mostly clear skies and increasingly warm temperatures to southwestern California into early next week. A weak storm system will bring cooler temperatures and a chance of rain after Wednesday. One last day of advisory level winds. Currently advisory level gusts are occurring in the mountains. These winds will filter down to the valleys and the coasts after sunrise and will persist into the early afternoon. Still a low end advisory with wind speeds much less than Friday and Saturday. Otherwise just a sunny and warm day with max temps 4 to 8 degrees above normal. A ridge extending up from the southwest with weak offshore flow. There will be some canyon breezes in the morning but nothing near advisory levels. Under sunny skies max temps will soar 5 to 10 degrees above normal. The ridge will be slowly knocked down on Tuesday as a trough moves in from the west. There will be a few more clouds, slightly lower highs and much weaker offshore flow. Max temps will fall off by 3 to 6 degrees, but still max temps will be above normal.
